

The Aquila 44

Raising the Standard of Excellence

Aquila Yachts continues to be the game changer in the industry with the introduction of its newest power catamaran, the Aquila 44. Built by the same expert design team responsible for the highly acclaimed Aquila 48, this newest addition takes its place in Aquila's full range of unprecedented power catamarans.

As the littler sister to the Aquila 48, the new 44 is the third power catamaran built by the Sino Eagle team and developed to be an exceptionally comfortable cruising boat; putting advanced technology at the forefront of all design and build decisions to continue to usher in a new standard of excellence in power catamarans.

From the hull shape to the selection of materials and manufacturing process, every consideration has been aimed at continuing the pedigree first born through the Aquila 48. She has been built to EC Certification, Category A which is the

recognized International standard for recreational boats.

The Aquila 44 features 3 cabins and 3 heads, a spacious salon and galley, large flybridge, and luxury upgrades to make cruising aboard nothing short of phenomenal.

The Aquila 44 boasts a very innovative interior layout including a master cabin spanning her entire 21 foot beam; a feature not seen before on a boat of this size. Large staterooms port and starboard each have ample headroom, storage and large windows for excellent views. The

en suite heads feature a fresh water flush, separate shower stall and teak flooring that complement the boat's design and exceptional living comforts.

On the main deck, she offers the signature 360 degree view from the salon with expansive panoramic windows inviting the outside in. The salon features a large seating area and plenty of storage to make live-aboard easy and pleasant. Galley features include Corian countertops, electric fridge and freezer, stove and stainless steel microwave oven as well as a double stainless steel sink. A new feature to Aquila power catamarans is the hydraulic window from the galley to aft deck which converts to a pass through bar for entertaining enjoyment.

The expansive flybridge includes multiple access points to and from the deck. Additional features on the flybridge are added enclosure, electric grill and sunpad seating on either side of the central helm station. Complete with our revolutionary bridge to bow direct access, the Aquila 44 is a fresh revolution of classic boating traditions.

Aquila 44 Specifications

Length overall with hull swim and protection platform	43 ft 8 in / 13.32 m
Length hull	41 ft 11 in / 12.79 m
Beam overall	21 ft 6 in / 6.56 m
Height above waterline with hard top	18 ft 8 in / 5.7 m
Draft	2 ft 8 in / 0.82 m
Light Displacement	135,053 lbs / 15,900 kg
Fully Loaded Displacement	40,212 lbs / 18,240 kg
Fuel tank (approx)	2 x 145 US gal / 2 x 550 l
Water tank (approx)	2 x 103 US gal / 2 x 390 l
Holding tank (approx)	3 x 21 US gal / 3 x 80 l
CE certification	A:8 ; B:8 ; C:12* ; D:20* (*TBC)
Volvo Penta diesel engines with V Drive	2 x D4 225hp / 165 KW
Distances in Statute Miles Estimated range (half load with 5% reserve on 461 gals/1750 l)	672 miles @ 7 knots 242 miles @ 15 knots 199 miles @ 22 knots
